Present:

ANDREW FULLER

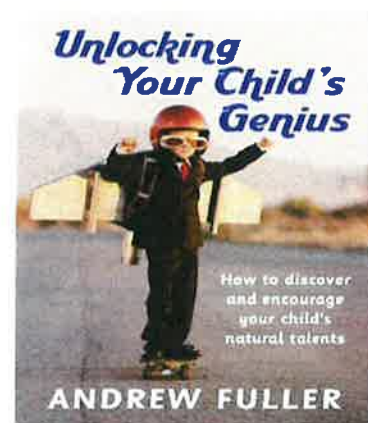

BUILDING RESILIENCE

Come and have a fun evening with well known clinical psychologist Andrew Fuller. Andrew's talks are always fun and informative!

Andrew is the author of the bestselling *Unlocking Your Child's Genius*. He has worked with over 200,000 young people nationwide and researched how to create great outcomes for children.

Topics covered will include:

- The active ingredients of resilience
- How parents can develop these in children
- Friendship and relationship skills
- Parenting tricky kids
- Creating happy kids
- Building self-esteem and dealing with set backs

This is a free event for parents & carers so come and have a great evening!

PROGRAM DETAILS

DATE: Monday, 3rd September 2018

TIME: 7PM – 8.30PM

Light refreshments from 6.30pm

LOCATION: Warrnambool Lighthouse Theatre, Timor St

RSVP: 5559 3000 or email elizabeth.kime@centacarewarrnambool.org.au

An appeal from Friends of Warrnambool Botanic Gardens Inc.

A proposal for a 'Nature based play space at Warrnambool Botanic Gardens' by the Friends of the Gardens has been seen as appropriate to compete for funds under the "Pick My Project" Victorian state government initiative. The development of nature play areas is a recommendation of the Gardens' Master plan which the Warrnambool City Council adopted in 2017.

If our project receives community support a creative play space using natural materials such as the large cypress stump, logs and rocks will be created close to Botanic Road and north west of the lake. Carefully selected plants will add interest and challenge. The area will provide for activities such as climbing, jumping and balancing as well as passive and creative play.

It will add to the already popular ducks, cannon and tree roots so valued by children and families over many years. It would be a lasting asset for Warrnambool.

Some examples of the types of activities to be found in nature based play spaces.

Projects to be funded will be chosen by popular vote conducted online between August 13 and September 17 and the Friends are hoping for strong support. We ask our friends, neighbours and all regular visitors to our beautiful heritage listed Warrnambool Botanic Gardens to register with Pick My Project and view our project proposal. We would be very grateful for your support in including our project in your voting.

Voting is open now

Geoscience takes to south west skies

An aerial survey of south west Victoria will measure extremely small variations in the Earth's natural gravity field to help inform the Victorian Government's scientific research into the potential for new discoveries of natural gas.

The survey will be carried out by two small, fixed wing aircraft carrying state-of-the-art technology. The planes will fly in public airspace along parallel lines spaced 500 meters apart. Flights will be at an altitude of 150 meters, increasing to 300 meters in built-up areas.

Flying will commence in August 2018 and take approximately 12 weeks. The survey will cover a large portion of the Otway Basin, and the planes will be seen over the municipalities of Colac Otway, Corangamite, Moyne, Glenelg, Southern Grampians and Warrnambool; as well as up to 18 km off the coast.

Most lines on the flight path will only be flown over once and the survey will have no impact on farming, fishing or the environment.

The Geological Survey of Victoria is managing the survey. The data collected will help geologists interpret the shape of sub-surface rock structures and refine geological models of the Otway Basin, which are being built as part of the Victorian Gas Program (VGP).

Fracking is not included in the VGP as it is permanently banned in Victoria.

Further information can be found at earthresources.vic.gov.au/gasprogram or by calling 136 186 or email to VGP@ecodev.vic.gov.au
